

# MEDCAP

## Prewired electrode cap

### Description

The innovative design of the cable-electrode connection system ensures a high level of reliability tested with different type of EEG amplifiers, the possibility to repair the cap quickly and easily and a great cap's flexibility.

- Elastic material headcap;
- Easy color coding system for different sizes;
- Easy to wash and replace the electrode;
- International 10-20 System.

UMDNS 17554

### Materials

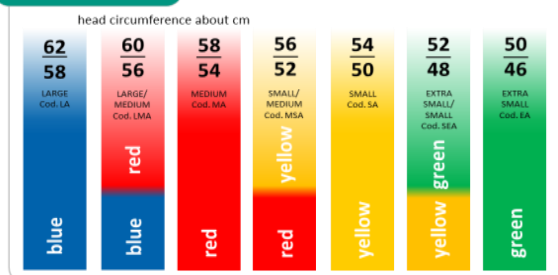

### Safety

### Specifications

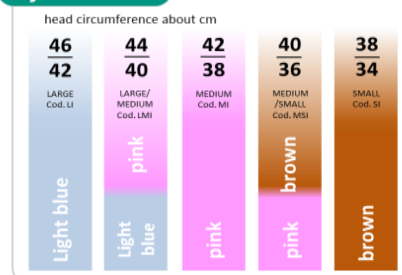

### Environment

Electrode	Tin (on request AgAgCl, sintered AgAgCl or Gold)
Electrode holder	HDPE
Lead wire	PVC
Headcap net	Lycra
Packaging	PP
Biocompatibility (UNI EN ISO 10993)	Yes
Latex	No
Nickel	No
Phthalates	No
Generic code	CAMXXXXXXXX
Electrode number	From 9 to 256
Recording Area	21 mm <sup>2</sup>
Connector	SUBD 25 (other connectors available on request)
RoHS II	✓
REACH	✓

#### Adult

#### Infant

#### Neonatal
